THE TIMES-GAZETTE, REDWOOD CITY, CALIFORNIA, FRIDAY, OCTOBER 29 1937

ESTABLISHED IN 1859

14-Day Meet Would Provide More Revenue

County Fair Type of
Show Urged; 1937
Cost Is \$8000

Faced with continued operating losses and new demands for expansion of facilities, the San Mateo County Fair Commission today filed its report recommending that the fair be placed on a county fair basis, and be sustained financially by a 14-day horse racing meet.

From a welter of figures submitted with the report it appeared that the income of the fair this year was \$11,341.98, the outgo \$19,672.98.

"The public now wishes something more than your commission has been able to present with the facilities available. There is actual demand from the residents of San Mateo county for space reservations to exhibit poultry, rabbits, pigeons, and other products of the county," the commission report, signed by Pres. Bruce S. Gibson, declares.

It requests permission of the board of supervisors to apply to the California Horse Racing Board for 14 days of racing to which the fair, as a county fair, would be entitled.

WOULD BUILD PLANT
The commission recommends that the supervisors erect a county fair plant with buildings adequate for the fair. Funds for capital expenditures accumulating in the state treasury will total \$35,000 January 15, 1938, the report shows. This money could be used for the new fair grounds, it is pointed out.

The 1937 fair fell short by one-third the income anticipated from admissions, and income from concessions was also less than the budget set up in the budget figure. Only half of the expected income from displays actually materialized.

Starting with a "nest egg" of \$2418.64 from the previous year, and \$10,000 appropriated by the county supervisors this year, the fair commission was able to point to a balance on hand at the

(See FIESTA RACING, Page 6)

Public Offered Chance to Learn Of Power Plan

An "opportunity to be entertained by the municipal band and to become informed on next Tuesday's power election" will be offered in the public meeting to be held tonight at the Sequoia high school auditorium, Mayor Paul A. McCarthy pointed out today as he disclosed topics for the meeting.

Following a concert by the band, under direction of Dr. R. Lee Otis, the talks will be opened by a discussion on "What Municipal Ownership Means to You" by Rudolph Spreckels.

A discussion of "Municipal Ownership in California" by Prof. Guido Marx of Stanford University will follow, with J. Rupert Mason then talking on "Progress Through Public Ownership." Mayor McCarthy will answer questions and objections.

The Pacific Gas and Electric Company has been invited to have a representative address the meeting, but officials of that concern said today they had not decided whether or not to attend.

Between talks, band numbers will be given.

The public is invited to the free meeting and concert, which starts at 8 o'clock.

Receivership Asked For Race Horse

"Shabonee," a race horse blessed with two owners, may be handled by a receiver to be appointed by the superior court if a petition filed here by Clinton Cox is granted.

Cox alleges that he entered an oral partnership with H. S. Jerrigan December 10, 1936, for the "ownership and operation" of "Shabonee," but that Jerrigan has consistently refused to listen to Cox's advice, wishes, or demands for a share in the profits.

The plaintiff contends that since the partnership was formed the brown filly has won more than \$2000 in purses. He claims that the horse was removed from its San Mateo stable without his consent, and demands that the partnership be dissolved, an accounting made, and a receiver for the race horse appointed.

Hugh F. Mullins Jr. of San Mateo is Cox's attorney.

ABILITY OF CITY TO OPERATE PUBLIC UTILITIES IS PROVEN

EDITORIAL

Demonstrated ability of Redwood City to operate two utilities—water and garbage disposal—efficiently and profitably should be ample proof that a third—electricity—could be handled with the city continuing to obtain the fine service now so justly boasted and yet save customers an average of \$5 a year through rate reductions and make profits of \$160 or more a day.

During the past nine years for which such records are available, Redwood City made a net profit of \$223,531—an average of \$75 a day!—on its water system. And this was in the face of rates consistently lower than those charged by private utilities in other peninsula cities.

Before 1928 the surplus was used both in retirement of bonds and to aid operation of other departments, thus making tax savings possible. Since the city's policy was changed, the surplus has been used exclusively to extend, enlarge and better the system and retire the debt. As a result, Redwood City now owns a water plant worth \$701,063 which actually cost the taxpayers nothing, all bonds but the present outstanding indebtedness of \$17,500 having been retired exclusively from surplus earnings.

Now with a cash surplus of approximately \$41,000 on hand, the city's 4159 customers are being given better water—two-thirds Hetch Hetchy—than ever before at but a slight increase in rates. Cost of Redwood City's supply is 50 per cent greater than before Hetch Hetchy was used regularly. Yet the customer pays but 14.3 per cent more.

That is why other San Mateo County towns envy Redwood City. They have no better service. They haven't as good water. They pay a good price for it. Yet they accumulate no earnings.

In the five years during which Redwood City has operated a garbage disposal system, it has cleared \$10,054 on the utility—nearly \$6 a day. Here too service has been entirely satisfactory.

If Redwood City votes next Tuesday to take over the power distribution system of the Pacific Gas and Electric Company, the high type of service now being rendered will be continued. Experienced P. G. & E. men would be employed by the city if displaced by the private utility. City Manager Dimmitt has committed himself to this policy.

Unfounded statements that public employees are not as efficient as those of private concerns are refuted by examples visible to us all. The test of efficiency in handling a municipal street railway in San Francisco shows that public ownership has been superior to private. Our neighbor city of Palo Alto, where all utilities are municipally owned—and where net profits from their operation, after allowances for depreciation, bond interest and retirement and betterments, approximate \$540 a day—has efficient service. Following the now famous electrical storm of November 1, 1935, Palo Alto restored service even more quickly than neighboring private utilities, if word of utility officials of that city is to be believed. Palo Alto has a corps of men available for emergencies, just as Redwood City would have. Twenty-four hour service would be maintained in the electrical department here as it now is in the police and fire departments. Just as a citizen can expect response from the fire or police departments when he telephones in the middle of the night, so could he expect service on his electric system, if it were needed.

Redwood City has but \$2933 annual taxes to lose. It has a new source of revenue—\$60,000 or more a year—to gain in the proposal that the power system of the P. G. & E. be taken over. If Redwood City wants that revenue for public improvements or relief of taxes, or both, it should vote "yes" on the two proposals on next Tuesday's ballot.

Chrysler Has New Features

Featuring an impressive array of 57 new improvements, the 1938 line of Chrysler motor cars is now on display at the showrooms of Dearborn Motor Sales, Chrysler-Plymouth dealer here.

Reports from dealers throughout Northern California indicate that at no time in the 14-year Chrysler history has so much enthusiasm prevailed among motorists who have viewed the new models. The 1938 Chrysler line comprises the new low-priced Royal; its companion car, the luxurious new Chrysler Imperial, and the Chrysler Custom Imperial.

All 1938 models are longer, sleeker in appearance and more powerful. The wheelbase of the Chrysler Royal has been increased from 116 to 119 ins. Horsepower also has been increased, to give new standards of performance and a greater degree of flashing acceleration for which Chrysler has always been famous. The new Chrysler Imperial has a wheelbase of 125 inches, an increase of four inches over that of last year. Horsepower also has been augmented.

Scores of new engineering features and refinements are to be found in both the Royal and Imperial. Brakes are larger and more powerful. Riding quality has been further improved through addition-

3000 Fete New Daly City Lodge

More than 3000 members of the Italian-Catholic Federation gathered in Daly City Sunday for the second of two days of celebration in honor of the newly organized Daly City branch.

Louis B. Dematteis, deputy district attorney and first grand vice president of the ICF, was master of ceremonies.

In competition with 11 units, the Redwood City delegation won a trophy for its smart appearance in the mile-long parade that marched from the county line to Colma on Mission street.

Grand President Attilio Raeta, San Francisco, presented a charter to Joseph Firpo, president of Daly City Branch No. 49. A banquet at Little Italy hall on Mission street and a dance at Theater Hall concluded the ceremonies late last night.

It took Columbus 70 days to cross the Atlantic ocean in his sailing ship.

al airplane type hydraulic shock absorbers, front and rear sway eliminators and a new type of springing. Steering gears on the new Chrysler have been effectively cushioned from the frame with live rubber, eliminating road shock and vibration from the steering wheel.

Exteriors of the two cars are decidedly smart in design without being extreme.

'Melting Away' Of Profits Seen By P.G. & E. Aide

A new statement discrediting compilations of possible profits to be derived from operation of the local power system as a municipal enterprise was made today by a Pacific Gas and Electric Company official, Kenneth W. Van Gundy, local sales superintendent.

Attacking some of the information as "manifestly inaccurate" and claiming that other calculations are based on "over-estimates" and "under-estimates," Van Gundy attempts in a prepared statement to show that any profit "melts away" under his own compilation.

His statement:

Mayor McCarthy and his associate campaigners for the \$75,000 bond issue have now published three different and confusing sets of figures intended to attract votes for a municipal electric system.

The mayor has promised the people various public improvements to be built from surplus revenue of the electric business if the bonds carry. To bolster this promise he has quoted a strange assortment of statistics to prove that there will be money left over for improvements.

First was a tabulation prepared in 1934 by Burns & McDonnell, a firm of Kansas City engineers whose business is the promotion of municipal projects. This tabulation purports to prove that 15 California municipally-operated electric systems earn "net profit" as high as 40 per cent. There is no indication what this term "net profit" means in this case. It has been shown that the information on about 25 per cent of the plants covered in the Burns & McDonnell report was fragmentary and manifestly inaccurate. Few of the figures as given agree with the statement of revenues and expenses of municipal systems reported by the state controller, who repeatedly has complained that municipal systems do not publish their financial data in form that can be checked or adequately compared. It is not known whether the "net profit" quoted is true surplus after all charges or before deductions that should be made. No reliance can be placed upon the Burns & McDonnell tabulation.

Next came analysis of revenue and expenses of the Redwood City electric system prepared by Carl A. Heinze, a Los Angeles engineer now engaged in promoting public ownership projects. Heinze estimates a profit ranging upward from \$52,490 in the first year of municipal operation. To arrive at this figure he over-estimates revenue, under-estimates operating expenses, under-estimates reserve necessary for depreciation, and disregards completely payments that must be made annually to amortize the bond debt. He also fails to make allowance for additions and betterments of the system which the city would have to make at an expense of approximately \$1000 a month. He fails also to allow for the \$5000 to \$6000 a year in company taxes which the city would lose if it purchased the system. When these deductions are made, Heinze's "profit" melts away. There would be no money left for public improvements, which is the only net profit the

(See K. W. VAN GUNDY, Page 6)

Gas Poisoning Suffered in War Claims Cafeman

Gas poisoning, suffered during the World War, claimed its inexorable toll Sunday when Bert R. Perrin, genial proprietor of "Bert's Place" on El Camino Real, passed away. He died at the veterans' hospital at Sausalito, near Los Angeles, it was revealed here today.

Mr. Perrin had lived in this vicinity for seven years. He was a native of San Francisco. Gassed in the war, he had been under care of doctors for several years. Early in September he was taken to the veterans' hospital at Livermore. He was transferred to Sausalito October 19.

He is survived by his widow, Mrs. Anne Perrin. He was a member of Corp. James Lindsay Wilson Post No. 2310, Veterans of Foreign Wars, and of San Francisco Lodge No. 3, B.P.O.E.

Now Is the Time to Enter Power Business

(EDITORIAL)

The trend toward public ownership is surely and swiftly growing. Redwood City now has a chance to join that movement. And there will never be a better or cheaper opportunity for Redwood City to get into the power distribution business.

The price set by the railroad commission for the Pacific Gas and Electric Company's system is more than the city thought it would be. But it also is far less than the P. G. and E. said the system was worth. It is certain the price never will be any less. In fact, it can only become more as the years go on.

If we borrow an example from our neighbor on the north, we can see what the cost of delay is. San Francisco finally in 1928 voted to buy the Spring Valley Water Company for \$41,000,000. This was the fifth vote on the proposal. At the time of the first, in 1910, the system could have been had for \$35,000,000—with 5000 more acres of land than was eventually secured. Each vote had been for more money than the previous one. Thirty-five million in 1910—rejected. Thirty-five million but with less property in 1915—rejected. Thirty-eight million in 1921—rejected. Forty million in 1927—rejected. Finally, 41 million in 1928. Six million dollars more

for five thousand acres less—because of delay.

Delay in Redwood City would mean only that if in the future we should decide to enter the power business, we would pay much more for the privilege than now. It already has been estimated that value of the P. G. and E.'s system is worth 20 per cent more now than it was two and a half years ago—date of the evaluation application. Whether the increase in value is that high or not, the property undoubtedly has gained considerably in value, just as has all other physical property. Yet we can buy the power distributing system today for what its value was February 9, 1935, plus what has been put into the system since that time. Even on that date, the P. G. and E. declared their system worth \$608,000. On the basis of its earning power, they told the railroad commission the utility had a value of \$750,000. Yet we can now secure the system for \$488,000, plus what has been added to it in the past two and a half years, plus the cost of putting the city in the power business—not more than \$575,000 altogether, according to conservative estimates of competent engineers and electricians.

If we are ever to enter the municipal power distribution business, now is the time. And the way to do this is by voting "yes" on the issues on the ballot next Tuesday.

Pictures of Griffin Trip Go on Display

Full-size photographs of incidents and sights seen on Frank Griffin's summer trip to South America, highlighted by a visit to Devil's Island, are on display in the store windows of Montgomery Ward on Broadway this week. The Sequoia high school athletic director's "shots" are supplemented by a map and drawings.

Investment Firm Sues Spreckels on Notes

Rudolph Spreckels, Hillsborough, former president of the First National Bank of San Francisco, was named defendant in a suit filed by City Investments, Ltd., to recover \$3,994,972.83. The investment firm claimed the sum was the amount due on 34 promissory notes given by Spreckels between November 6, 1933, and February 16, 1937. The notes were said to range in amount from \$500 to \$500,000.

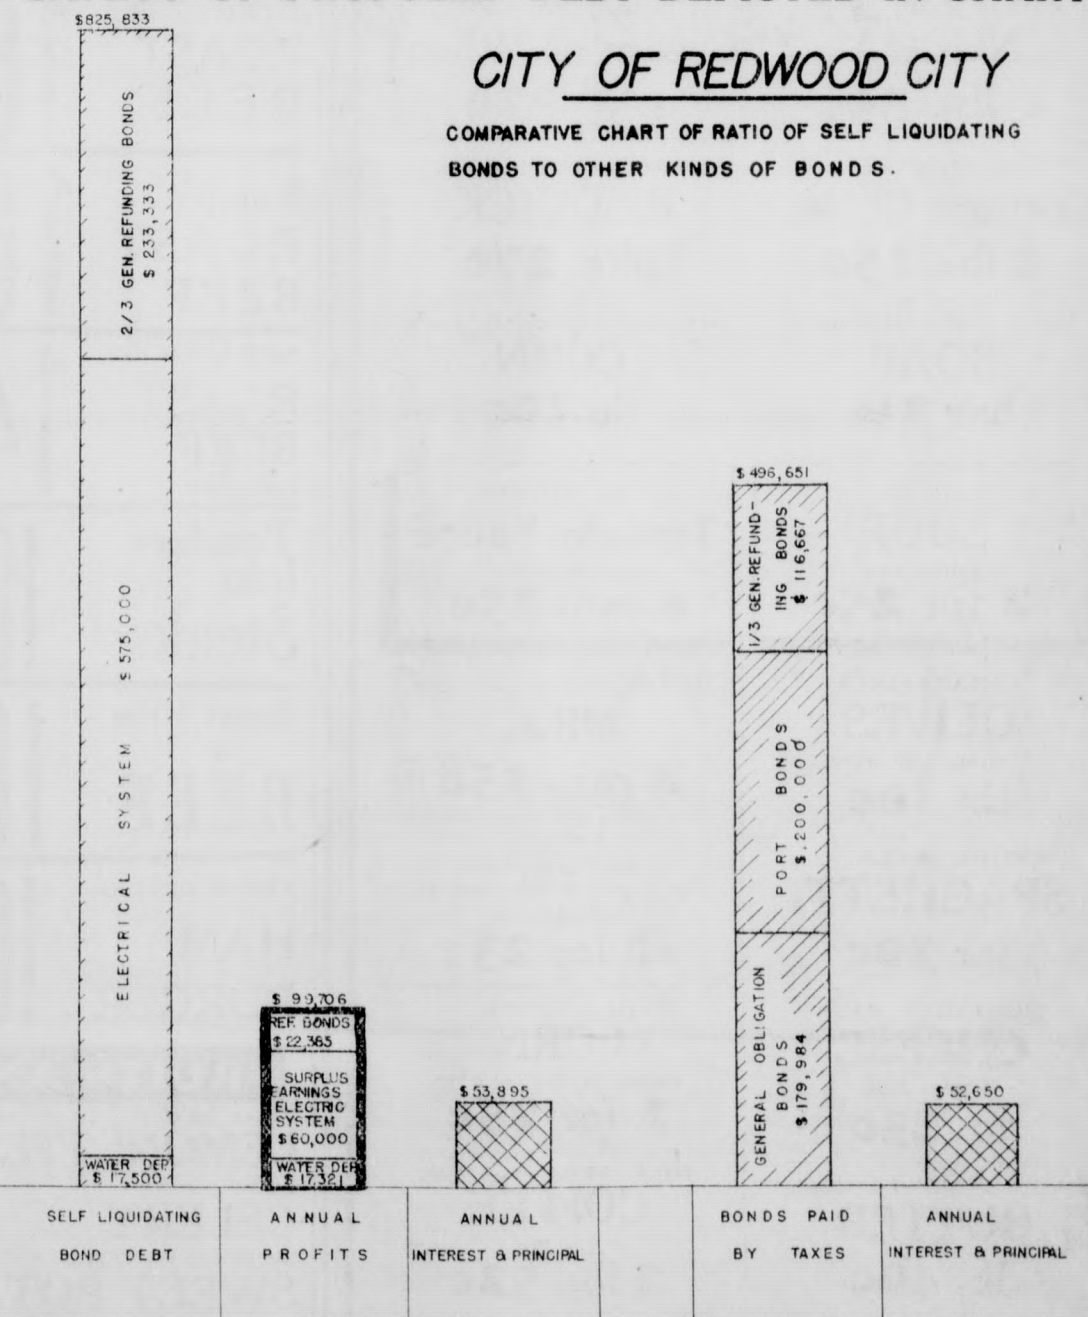

Grasso Denies Guilt On Illicit Still Charge

Guido Grasso, 61, charged with operating a still at his Arlington road home, entered a plea of not guilty when arraigned before Justice of the Peace Edward I. McAuliffe Tuesday. Grasso was represented by Atty. Sol Abrams, former assistant United States district attorney in San Francisco.

SAFETY OF PROPOSED DEBT DEPICTED IN CHART

CITY OF REDWOOD CITY

COMPARATIVE CHART OF RATIO OF SELF LIQUIDATING BONDS TO OTHER KINDS OF BONDS.

Brief study of this chart will show that the voting of \$575,000 in bonds to take over the power distribution system of the Pacific Gas & Electric Company will not overburden the City of Redwood City. The column at the left represents that portion of the bonded indebtedness—should the power bonds be voted—which would be self-liquidating. The profit to be made on the bonds is shown in the second column, while the cost of servicing them is shown in the center column. The bonds which might not be self-liquidating (and even something toward their payment is expected from harbor bonds) are shown in the tall column on the right. Payments on these bonds is shown on the extreme right. It will be noted that the anticipated annual profits (\$825,833) expected from the water, power and refinancing bonds would be nearly as much as the entire cost of servicing all bonds (\$106,545).

While the early submarines took 25 minutes to submerge, modern war-time submarines can submerge in from one to two minutes. The submergence time has come to be a vital factor in providing rapid escape from gun ramming and attack.

For navy men, a ship does not fly a flag, she wears an ensign.

X-rays generated by voltages up to 20,000 have been actively used in this country and abroad since 1918 in the treatment of cancer, tumors and other serious diseases. Minelaying was originated during the World War.

The double hull type of submarine is sometimes called "submersible."

NOTICE TO TAXPAYERS CITY TAXES 1937

NOTICE IS HEREBY GIVEN that the Taxes on all Personal Property, secured by Real Property, and one-half of the Taxes on all Real Property will be due and payable, Thursday, Oct. 21, 1937, and will be

Delinquent on December 6th

the first Monday in December, 1937, at 5 o'clock P. M. and unless paid prior thereto, 8 per cent will be added to the amount thereof. If the said first installment of said taxes be not paid before April 20, 1937, at 5:00 P. M. an additional 3 per cent will be added to the amount thereof. The remaining one-half of the taxes on all Real Property will be payable on or after January 20th next thereafter and delinquent on April 20th, 1938, at 5 o'clock P. M., and unless paid prior thereto 3

Peninsulans Given Important Fair Jobs

Three peninsulans drew important posts today as F. M. McAllister, chairman of the California commission for the Golden Gate International Exposition, announced the committees that will direct various phases of preparation for the 1939 San Francisco event.

J. B. Howell of Atherton will be chairman of the committee on arts and will serve on the public relations and state exhibit groups.

Col. Frederick Peterson of Burlingame will be chairman of the industrial committee and will also be a member of the livestock, mining and public relations committee.

A. P. Giannini of San Mateo will be on the committee of finance, events and social affairs.

An average of 15,214,366 boys and girls were in school each day of the 1933-34 term in 41 of the 48 states.

per cent will be added to the amount thereof. All taxes may be paid at the time of the first installment, as herein provided, is due and payable.

Taxes may be paid on any day at my office, except Sundays and holidays, in Redwood City, at the City Hall, between the hours of 9 a.m. to 5 p.m. Send description of your property when asking for tax statements. Notify this office of your change of address.

Address all communications regarding City Taxes to NELLE L. MIRAMONTES, City Collector, Redwood City. Published in Times-Gazette Oct. 22, 29, 1937.

RIGHTS-OF-WAY FOR NEW HETCHY LINE GRANTED S. F. WATER BUREAU

Armed with an order for immediate possession of the necessary right-of-way, the City and County of San Francisco today prepared to start construction of the line which will carry Hetch Hetchy water to Atherton, Menlo Park, the veterans' hospital, and Palo Alto.

Complaint against more than 100 property owners was filed in the superior court Monday, listing the various parcels required for the construction.

Judge A. R. Cotton signed an order of immediate possession, requiring posting of bonds for claims of the property owners against the city for the land taken. Amount to be posted and the remuneration to be paid are to be determined later, it is understood.

Among the defendants named in the action today are the Town of Atherton, Southern Pacific Company, May Belle Fleishacker, Roger Reynolds, Menlo Park School District, Leland Stanford Junior University, City of Palo Alto and the County of San Mateo.

The complaint prays for an immediate determination of the value of the property and asks judgment against the plaintiffs under con-

demnation for an easement for the water line.

Direction of the water line is southerly from Nottingham avenue, Redwood City, through Atherton and Menlo Park to its terminal at California avenue in Palo Alto.

Low bidder to construct the line is Macco-Robertson Ltd., at \$213,620. Bids were opened in San Francisco last Wednesday.

M. E. Sunday School Boosts Record Mark

Breaking the attendance record for the second time within four weeks, the Sunday School of the First Methodist Church reached a new all time high Sunday with 203 officers, teachers and scholars present.

The upper division launched its fall attendance effort. Highest per-

centages were registered by the "Crusaders" class, of which Donald L. Bogle is teacher, with 48.80 points. The "Lieutenants," Paul Miles teacher, and the "Golden Rule" class, Mrs. Bogle teacher, were tied for second place with 48.50 points. The other seven classes are close on the heels of the leaders. The attendance effort will close December 12.

W. Earl Whitaker is new superintendent of the Sunday school.

WHY YOU SHOULD VOTE

YES

ON BOTH PROPOSALS TO GIVE THE PEOPLE THEIR POWER

NEXT TUESDAY, NOVEMBER 2

Municipal Ownership of the Electric System

WILL

ASSURE lower rates to users—10% or more—\$18,500 a year or \$5.29 for the average user!

ASSURE lower taxes by transfer of part of profits to the City's general fund!

ASSURE profits of \$60,000 to \$78,000 a year on admitted gross income of \$185,000 a year! This is almost \$200 per day! Keep it at home!

ASSURE more public improvements than could otherwise be provided!

ASSURE a new source of money for needed extension of Port facilities!

BRING new industries and new payrolls to our Port area with cheaper power and lower taxes!

INDUCE new residents to locate here and thereby improve retail business!

EXTEND the already useful and profitable publicly owned water, street lighting and garbage collection and disposal systems!

PUT REDWOOD CITY in line with the majority of the cities and towns of the United States in the ownership and operation of the electric system!

ENABLE the City Council to acquire the P. G. & E. system by condemnation (proposal No. 1); or to buy the system by negotiation, or—as a last resort in case of protracted litigation—to build our own system (proposal No. 2).

Municipal Ownership of the Electric System

WILL

NOT RAISE taxes one cent—interest and principal of the bonds will always be paid from PART of the profits!

NOT OVER-BOND the city—70% of ALL city debt will be self-liquidating!

NOT ENDANGER the development of the Port!

NOT DISLOCATE P. G. & E. employees!

NOT INJURE local P. G. & E. stockholders!

PROOF

Annual profit after paying interest.....\$60,000
Annual retirement of bonds.....20,000
Surplus for use in constructive municipal betterments.....\$40,000

Money borrowed at 3% will show a profit of 10% to 12% net—ample to pay off bonds.

Statement of Elmore B. Hinman, President of Port Commission.

City Manager Dimmitt has stated that preference will be given to P. G. & E. employees upon transfer of ownership.

Stockholders' benefits as taxpayers and consumers exceed dividends. Local system only three-tenths of one per cent of entire property. Fully compensated for in purchase price and by contract to buy all power for five years from P. G. & E.

First Bridge Suicide Told

The will of Harold B. Wobber, first man to jump from the Golden Gate bridge, was admitted to probate Monday. Included in the said pronouncements of the will itself and the accompanying evidence to prove Wobber's death was written the dramatic story of his suicide August 7.

Accompanying the will is an eye-witness story of the fatal jump. According to an affidavit filed by Louis H. Naylor, professor of French at Trinity College, Hartford, Conn., Wobber merely took off his coat and vest and announced, "Here's where I go over." Wobber jumped despite efforts of Naylor or to restrain him.

The two met casually on a street car en route to the bridge head on the afternoon of August 7, one to see the mighty span for the first time, the other to become the first to jump from its guard rail.

They walked to the Marin side together, Wobber explaining details of construction to the eastern visitor, reciting his experiences in the World War and his service as a bargeman on the bay.

On their return to the San Francisco shore, Wobber lagged. It was cold, and Naylor announced his intention of hurrying on. In reply, Wobber took off his coat and vest and handed them to the easterner.

"Here's where I go over," he said, with a fixed stare that indicated his determination. Naylor grasped him by the belt, shouted at Wobber "not to be a fool," but Wobber escaped him.

"I didn't have the nerve to watch him fall, but fall he certainly did," the affidavit states. Wobber left his estate to his former wife, Mrs. Dorothy Marion Jackson, and to his daughter, Barbara Alice Wobber.

The climatic temperature of Alaska varies from 60 degrees below zero in the winter to 90 degrees above zero in summer.

The Scots Guards, once a famous regiment in the British army, were abolished in 1830.

3 Die to Bring Year's Traffic Toll Here to 52

Pedestrians Victims Of Week-End Auto Accidents

Death stalked San Mateo county's highways from one end to the other over the week-end and struck down three pedestrians to send the year's traffic fatality toll to 52, as compared with 50 at this time last year.

The dead:

Andronico ("Bozzo") Agresti, about 55, Colma rancher.

Pat McBride, about 35, gardener living at 500 Middlefield road, Palo Alto.

Montie M. Agie, 58, of Haines, Ore., groom employed at Bay Meadows.

Agresti was the first to lose his life. He was crossing Mission street in Colma at 8:25 p.m. Saturday when he was struck down by the northbound car of John Wilson, 19, apprentice machinist living at 84 Willis street, Daly City, police of that city reported. Wilson was charged with negligent homicide and released on \$250 bail. He was questioned by the district attorney today and indications were the case would not be prosecuted. Wilson said the man fell in front of his car.

REPORTED INTOXICATED McBride died shortly after 3 a.m. Sunday on the Bayshore highway in East Palo Alto when hit by the car of Joseph Van Agtmeal, 27-year-old soldier stationed at Moffett Field, patrolman reported. Mrs. P. M. Stern, owner of a nearby cafe, said McBride, who was "very drunk," was trying to cross the Bayshore from her restaurant to a garage to call a taxi. Van Agtmeal was not held but was directed to appear in the San Mateo county district attorney's office today for questioning.

Agie, who was employed by W. A. Thomas of Belmont, was crossing El Camino Real near Bay Meadows when he was struck Sunday night by the car of Harold S. Anderson Jr., visiting here from Los Angeles, and knocked into the path of another machine, which failed to stop, police were told. He was instantly killed, his body badly mangled, according to D. P. Coroner Daniel O'Connell, of Coroner William Crosby's office, where the body was taken. Anderson was not held.

San Jose J. C. Faces Revamping Of Fee Schedule

A recently completed report by Dr. Aubrey A. Douglass, state chief of the division of secondary education, threatened today to force San Jose State Junior College to revamp its fee schedule, but San Mateo Junior College, having no compulsory fees, will be unaffected, according to President C. S. Morris.

Dr. Douglass' report said that "state department finds no legal authority for any of the fees and deposits required of secondary students except those specifically named by the school code," namely, charges for "tuition, not to exceed \$6 per pupil per term which may be made of adults in certain types of special classes . . . for textbooks . . . and for non-resident tuitions," according to the Associated Press.

At San Jose, expenses of the average student are \$70.75, according to the catalog. A tuition fee of \$4.33 is due each quarter, payable on registration. For late registrations, there is a \$2 charge. Also required is a \$4.67 student body fee, personnel test fees, physical education fees and laboratory fees, in addition to books and miscellaneous supplies.

But at San Mateo, President Morris said, there are no tuition fees or any compulsory student body fees.

"We do assess fines for the breaking of equipment, such as laboratory supplies, payable at the end of the year," he added, however.

Morris explained that only San Mateo, Sacramento and one or two other junior colleges do not have compulsory fees.

What to do about the situation is expected to be ironed out at a meeting in San Francisco Friday of college superintendents, where President Morris is to lead a discussion of Dr. Douglass' report. Dr. Douglass, Morris anticipates, either will recommend that colleges comply with the law or else have the fees legalized.

He explained that where state colleges like that at San Jose have had junior colleges, they have been in effect classifying all their students as state college enrollees, therefore forced to pay the state college fees, which are legal while junior college fees are not.

Belmont to Halt Garbage Dumping

BELMONT, Oct. 26.—Dumping of garbage in violation of the city's garbage ordinance must stop, the city council ruled last night in authorizing Police Judge S. J. Cook to cite or arrest citizens known to have discarded refuse on side streets in lower Belmont. The council also authorized Police Chief Fred Johnson to employ a night officer.

Discussion of the trailer problem also was held, Chief Johnson reporting that 12 trailers already have located in Belmont. City Atty. Albert Mansfield reported that he soon will have an ordinance prepared for consideration. High insurance rates were complained of by R. McGowan, owner of highway property. His complaint was referred to the fire commissioners. Application of Foster & Kleiser

to improve the Standard Oil Company sign at Ralston boulevard and El Camino Real was referred to the planning commission. Applications of J. P. Duffy, Seymour Davidson and Blanche Davidson to reopen the Nerve Rest Sanitarium were taken under consideration. City Engineer Charles Morser was authorized to make arrangements for installation of the manually-operated traffic signal at the corner of Ralston boulevard and El Camino Real.

Fiesta Racing Meet Proposed

(Continued From Page 1)
close of 1937 business.

FIGURES BEING CHECKED
Whether or not these figures would check with the report now being made by Assistant Controller George Filbert will not be known until Filbert completes his investigation.

"Your attention is directed to the amount of approximately \$4000 remaining in the fiesta fund which places the cost of the 1937 fiesta to the county at \$5400," the report states.

FREE PUBLICITY
The commission secured 17,000 column inches of free publicity for San Mateo county in newspapers of the Pacific Coast and nation, the report states, with paid advertising in only 30 publications, gratis radio programs, 375 billboards, 175,000 envelope and package enclosures, and 3000 auto bumper strips spread the word of the fiesta far and wide.

At the end of three years of operation, the commission's report listed the following items:

- * \$10,000 spent for San Mateo county labor.
- * \$40,000 spent with San Mateo county merchants.
- * \$22,500 distributed in premiums.
- * \$60,000 returned to the county from the state.
- * \$2500 in capital assets.
- * This program cost the county less than \$20,000, the commission contends.

By comparison with 1936, the number of paid admissions increased this year from 16,540 to 40,360.

Value of the "gate" was \$8139.70 last year, \$9002.25 this year.

Value of equipment purchased this year from funds on deposit with the state treasurer was listed at \$4025.

The 1937 fiesta still has \$984 coming in, which will bring the total income for the year, including the \$2418 balance from last year and \$10,000 from the county, to \$24,335.95.

This figure compares with an estimated income of \$23,800, a total which contemplated only \$3500 from the county's general fund.

K. W. VAN GUNDY

(Continued from Page 1)

public is interested in.

And then Mayor McCarthy picked out certain statements made by the company's rate engineer which he interprets as evidence that Redwood City would make a "huge profit" of approximately \$60,000 from the system. He failed to make clear the fact that the figures submitted by the rate engineer were "net for return," an accountants' phrase not at all synonymous with profit. "Net for return" means the amount of revenue remaining after payment of operating expenses, depreciation and taxes but before payment of interest and principal. "Net for return" cannot be regarded as true surplus. It is not surplus for construction of public improvements.

Redwood City will have to pay from its "net for return" the interest and principal annually on the \$575,000 in bonds it proposes to issue. Subsequent also from "net for return" the taxes now paid by the P. G. & E. Subsequent also \$1000 a month for betterments and additions to the system and the \$13,000 a year saved by consumers because of a rate reduction made by the company since the valuation proceedings were held. There will be little or nothing left for public improvements when these reductions are made.

Guy Bush, veteran right-hander of the Boston Bees, reports that it took him three years of daily practice to master the screwball he used so effectively this season.

Temple's opening game victory over Virginia Military took the form of a little present from the Owls to Pop Warner, when they presented the veteran coach with his 300th gridiron conquest.

Fans have been in use as long as recorded history.

A Three Days' Cough Is Your Danger Signal

No matter how many medicines you have tried for your cough, chest cold, or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with any remedy less potent than Creomulsion, which goes right to the seat of the trouble and aids nature to soothe and heal the inflamed mucous membranes and to loosen and expel the germ-laden phlegm.

Even if other remedies have failed, don't be discouraged, try Creomulsion. Your druggist is authorized to refund your money if you are not thoroughly satisfied with the benefits obtained from the very first bottle. Creomulsion is one word—not two, and it has no hyphen in it. Ask for it plainly, see that the name on the bottle is Creomulsion, and you'll get the genuine product and the relief you want. (Adv.)

Two Airports In S. F. Plans

With a \$2,850,000 bond issue at stake in the San Francisco election November 2, municipal airport officials today denied that there will be any conflict between Mills Field and the proposed Yerba Buena airport on the shoals built for the 1939 fair.

"Both fields will have their use, since there is a definite need for two airports," declared Airport Manager E. M. Doolin yesterday. "The Yerba Buena site will be available for light planes on short hauls. The present field will be the terminal for the huge passenger and air mail transports."

"The municipal airport will continue as the commercial base of the air liners. The smaller Yerba Buena port will be a passenger terminal."

It is estimated that a submarine can attain not more than 23 knots surface speed with the present 3000 h.p. engines

that day, and the Court Room—Probate Department No. 1 of said Court, at the Court House in Redwood City, in the County of San Mateo, State of California, have been appointed as the time and place for proving the will of Mary Barilli, deceased, and for hearing the application of Bank of America National Trust & Savings Association for the issuance to them of Letters Testamentary thereon. "Heidi," the sweetest story ever told, with Shirley Temple and Jean Hersholt, will be featured on the Sequoia screen this Sunday, Monday and Tuesday on the same bill with "Back in Circulation," starring Pat O'Brien and Joan Blondell.

Jury May Wind Up Year's Work Friday

Final report of the San Mateo County Grand Jury, which has been in session since December, will be presented by a sub-committee Friday night, it was learned today.

The Friday night session of the jury may be the last session of the inquisitors. According to C. M. Doozee, secretary, if the jury adopts the report presented Friday, the document will be filed with Superior Judge Maxwell McNutt. Judge McNutt then will probably discharge the jury.

Doozee indicated that the Hood & Strong audit would be incorporated in the final report. He said no county officials have been summoned to appear at the Friday session.

Apfel strudel is an Austrian dessert made with apples and dough. Brazil does not admit gypsies to the country.

Winter Needs For Cars Told

For the sake of comfort and safety the motor car owner should anticipate his winter motoring needs now and completely equip his car before winter weather sets in, and for the sake of economy he should do this before October 30th in order to take advantage of the extra savings offered during the Western Auto Supply Company's Fall Festival of Values, which ends on that date, according to V. E. Jones, local manager of the accessory firm.

"Sure gripping tires are of paramount importance to motoring safety during winter months," Jones declares, "and in order to aid motorists in replacing smooth, worn tires, we are offering extra trade-in allowances on those old tires when traded in on new Western Giants with scientifically designed treads for safe non-skid traction on any highway."

"To other features of our great Fall Festival of Values Event are the extra savings available to motorists on batteries and oil. Everyone knows the need for switching to the use of winter grade oil in his automobile engine, and will appreciate the opportunity to stock up for the winter on high quality lubricating oil at distinct savings."

Hendricks Plea Set Over to November 1

W. W. Hendricks Jr., charged with negligent homicide as the result of a fatal auto accident August 4, was given another week in which to enter a plea when his case was called in Judge A. R. Cotton's court Monday. The postponement was requested by Edmund Scott, Hendricks' attorney. Two criminal cases were continued one week to be set for trial in Judge Maxwell McNutt's court. Winfield J. Randhahn, charged with robbery, pleaded not guilty and waived jury trial as did J. F. Tomlinson, held on a bad check complaint.

IT'S SERVICE THAT COUNTS

P. G. & E. Service Is Efficient and Dependable Day by Day and When Emergency Comes---

The vital function of the electric utility is Service—continuous, dependable Service to every customer day by day—fast and skillful Service when storm or other disaster breaks wires, topples poles, and interrupts the regular flow of electricity to users.

Interruption of electric service may be serious in its consequences. Lives are in danger when the lights go out—all machinery of the community breaks down. That is when the electric company must be armed with every facility to make repairs and restore the lights without delay.

Redwood City has the advantage of electric service supplied by an organization with large reserves of manpower and equipment to call upon in emergency. It serves the entire peninsula and if need be can bring men and trucks in from San Jose and San Francisco. It is equipped to restore interrupted service with the least possible inconvenience to its customers.

Here Is An Instance In Proof:

A terrific wind and rain storm the evening of November 1, 1935, Redwood City was hard hit. Hundreds of trees went down, breaking power lines, blocking streets, and causing general interruption of electric service. The P. G. & E. was on the job. Seven heavy line crews, fifty men in all, went to work. They first restored service in the downtown section of Redwood City and then in the residence sections.

Without sleep or relief these crews worked all night and until almost noon the following day to restore service to the Company's customers and clear the streets of hazards to life and limb. Seven telephone operators stayed on duty all night dispatching trouble calls.

As fast as trouble was reported men were rushed out to repair the damage.

It's Service like that which counts, which guarantees to every user of electricity the maximum in convenience, protection and safety.

Every day our Service Men are prepared to attend to customer needs—whatever the trouble may be, they will do their best to correct it.

HIGH FIDELITY RADIO

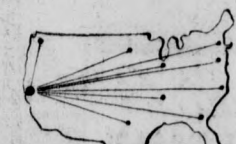

Broadcasting Stations have spent fortunes to improve equipment

Hear the Better Programs now on the Air at their BEST.

Accurate Precision Tuning for Perfect Living Tone

Local Stations Now Get the Nation's Best Programs

Is your radio three years old or more? Does it bring all the fine things that are on the air today just as if "you're there in person"? Make this test. Hear your favorite program on a 1938 High Fidelity Radio. Note the difference.

Here's why. Your local broadcasting stations have spent fortunes to send out programs with wider range and depth of tone. Voice and music go forth as living sound. But most of this is lost if YOUR radio receiving set does not bring in these programs as clear and beautiful as when they left the studio.

Let your ears be the judge. Listen to quality radio reception from a quality radio set in your own home. Improved tubes, easier and more accurate tuning and high fidelity mechanism bring you studio realism. Ask your electrical dealer for a home demonstration with a 1938 radio today.

MENLO PARK NEWS

The second program given by the 26th district, American Legion, was held at the U. S. Veterans' Facility last Friday night. Mrs. Isabelle Weeden Lindquist, 26th district chairman, arranged the event.

Appearing on the program were the Redwood City Native Sons' Haywire Orchestra, with Duncan Reynard as soloist; song and dance numbers, Frances McParland and Lorraine Height; tenor solos, Victor Pasche, accompanied by Mrs. Lindquist.

Commander Lee Williams of the 26th district was present and brought greetings from the Department of California, American Legion.

The next program will be November 15.

Mr. and Mrs. W. J. Moss (Myra Kurtz of Menlo Park) gave a dinner party Sunday at their Palo Alto home in celebration of two birthdays which fall near together this month, those of Mrs. Fannie I. Kurtz, mother of Mrs. Moss, and Mrs. Lucy Moss, mother of the host.

Others in the party were Mr. and Mrs. Milton Abbott, brother-in-law and sister of Mr. Moss, Mrs. W. K. Martin, and Harold Kurtz. Halloween decorations were used.

Mrs. Arthur Taylor gave a luncheon to her friends Tuesday. Many came from Menlo Park and Redwood City.

Grand President Ethel I. Begley will pay an official visit to Menlo Park parlor, Native Daughters of the Golden West, on November 16. The members are making preparations for the coming of the grand officer, who is to aid in initiating several new members.

The joint card party planned by the Native Daughters and Native Sons for the benefit of homeless children will be held in Central School auditorium next Thursday at 8:15 p. m. Score cards will be 25 cents.

Santa Cruz avenue is rapidly becoming a business center. Two stores opened last week and more buildings are being constructed for commercial purposes. Over 20 years ago the late William J. Murray predicted that this would one day be the business part of Menlo Park. His dream is coming true.

Frank Kirkpatrick, who went to the hospital in San Mateo three weeks ago, is reported convalescing and may return home shortly.

A number of young people from the Christian Endeavor of the Presbyterian church here took part in a union service with Los Gatos Christian Endeavor at Los Gatos last Sunday evening. The party was chaperoned by Mrs. F. E. McClure.

Two New Daily Columns Offered Tribune Readers

Two new features, both of them taking the form of columns, are presented daily to Tribune readers.

The first, designed to give the "inside dope" on what is going on at the county courthouse or in county politics, is written by Ray Spangler, city editor of The Tribune, whose duties include courthouse reporting.

The other is a radio column, written by Homer Canfield, and titled "Radiologic." It is just that. The mystery and glamour that surrounds radio, its personalities, and radio broadcasting, has been opened up by a newspaper man, and The Tribune is proud to bring to its readers the daily column of Canfield, who for six years has been reporting on the activities of the radio world direct from the colorful center of radio broadcasting—Hollywood.

Recent addition to the Tribune staff, Spangler has lived in the county for 20 years, 10 of which he spent in newspaper work which brought him into close contact with public affairs.

Canfield, in his capacity as radio columnist, has become the friend of great and small alike in the field of radio, and it is this close connection with the people that go to make Canfield's "Radiologic" a favorite feature wherever it has been published.

Canfield's "Radiologic" differs from the usual run of radio columns. It is not limited to a series of paragraphs dealing with "what is on the air tonight in the order of appearance." Once a week, the column will feature "The Woman's Angle of Radio." Another weekly feature is an "Open Letter" to some radio artist. This is a frank discussion of the radio artist—his good points, or his weaknesses. It has proven to be a very entertaining and constructive "open forum."

Complete recovery, however, with likely no visible scars, is predicted for the fourth victim of the mysterious explosion, Clarence Tyler, 35, of 219 Anita road, Burlingame.

GHOST GUNMAN SHOTS INTO HOME AT EAST PALO ALTO, SMASHES VASE

Another "phantom gunman" took his place on San Mateo county's records with the report filed today in the sheriff's office that a bullet whizzed into the home of C. P. Harbison, on Oak Wood Drive near Oak Road in East Palo Alto, and smashed a vase.

The bullet entered a kitchen window, passed through a zinc plate, smashed the vase and embedded itself in the wall of the front room.

Deputy Sheriff Leland Quinlan investigated. He attributed the shooting to youngsters with rifles, probably hunting pheasants in a nearby field.

Only the fact that it was Sunday saved Mr. and Mrs. Harbison from possible injury. Ordinarily Harbison, a chef at Mollenhauer's, is in the family kitchen at 9 a. m., time of the shooting.

He said he heard two shots before the third one which struck the house.

Max Beder, Retired Local Merchant, Dies

Funeral services for Max Beder of 511 Iris street, Redwood City, merchant here for 10 years before he retired last December due to ill health, were held Wednesday at the chapel of Portals of Eternity, Hills of Eternity Cemetery, San Francisco, with Rabbi Goldstein officiating. Mr. Beder passed away Tuesday in St. Francis Hospital, San Francisco.

Mr. Beder, who was born 49 years ago in Winnipeg, Canada, had lived here for the decade during which he operated the ready-to-wear store on Broadway which was closed when the building was

VOTE AGAINST THE BOND ISSUES!

Why Gamble \$575,000 on a Questionable Plan?

The undersigned committee of tax payers and voters urges all citizens to vote NO on both propositions for acquisition of the local electric system.

HERE ARE THE REASONS:

1. Bonds will be general obligation bonds, a mortgage on all taxable property. Tax payers will be liable for interest and principal.
2. Redwood City's bonded indebtedness will be raised to \$1,322,000, the biggest bonded debt of any city in San Mateo or Santa Clara Counties.
3. Electric bond issue threatens municipal harbor project. Additional financing of the port would be impossible.
4. More bond issues may be expected if city enters electric business. No one knows whether \$575,000 will be sufficient.
5. If the bonds carry, the city will lose most of the P. G. & E.'s \$200,000 payroll by forcing the removal of district headquarters.
6. The assessment roll will lose nearly half a million dollars worth of taxable property. The city will pay no taxes on the electric system. Tax payers will have to make up the loss.
7. The schools will suffer by reduction of assessment roll and loss of P. G. & E. taxes.
8. No reduction of rates has been promised. The promoters don't know whether they will be able to reduce electric bills.
9. We have good electric service now at low rates. We don't know what kind of electric service we would have under municipal ownership.
10. This \$575,000 bond issue accomplishes nothing but to transfer ownership from the private company to the city. The people would get nothing they do not now have. No new money would be brought into the city, no new industries would be created nor any new payrolls.

IT IS A BAD BARGAIN

VOTE NO on the Electric Bond Issues

FALSE TEETH WEARERS At Last, A Better Way to Hold Loose Plates FREE SAMPLE PROVES IT!

Here's a remarkable new and different way to hold false teeth. Not a powder—won't spill or cause mess. You need use it only once a day—or even less. Enables you to eat such foods as steak, bread and corn. Even tiny poppy and berry seeds are effectively kept out. A godsend for lovers. This new discovery is called STAZE. Send today for FREE sample, or ask your druggist for STAZE—try it—if you are not delighted, your money will be cheerfully refunded. For sample, write The Phillips & Benjamin Co., Dept. 10, Waterbury, Conn.
